JavaScript / HTML / CSS / C++ / Python / Bootstrap / C

PROJECTS

Traffic sign detection and recognition

[01/09/2020 – 01/02/2021]

It is an application that can detect traffic signs using a webcam and output the recognized symbol on the screen. Our Goal was to develop an **efficient real-time traffic sign detection and recognition system** that helps the drivers to avoid road accidents and **alert** whenever there is a relevant traffic sign.

Solar Panel Automation Module

It is a project in which our team made a solar panel module which would automatically align itself to where it would receive maximum sunlight.

SOS LED Blink lights

It is a safety project. In this project, we made a circuit using a 555 timer to make lights blink that would send a Morse code dispatching the signal when converted to English is "SOS".
